

"Where Do We Put It?"

Headrest Printer Mount for Canon iP100

LEM Solutions, LLC provides quality vehicle printer mounts for printers used in law enforcement, construction, utility and other mobile applications including mobile inkjet printers (HP, Canon and Primera), and mobile thermal printers (Brother, Zebra and Printek).

We solve the ***"Where Do We Put It?"*** problems inherent in space-constrained vehicles with our patented headrest printer mount (*U.S. Patents 7637566, 7874612, 8336959, 9073464, additional patent pending*) and modular mounting system to provide additional and convertible mounting options for the console and the partition.

Our owners include former law enforcement officers. All of our products are proudly made in the USA with quality heavy gauge black powder-coated steel.

To learn more about us and our products and see why law enforcement agencies across the US are using our products, please visit our website today or contact us at:

Headrest Printer Mounts

Our patented headrest printer mount* is the perfect option for mounting a mobile printer where space in a vehicle is at a premium. The mount securely positions the printer up and out of the way yet within easy reach for printed documents. And it does not interfere with airbags or other equipment.

Headrest Printer Mount for HP100

Supported printers

- Brother: PocketJet and Rugged Jet
- Hewlett Packard: HP100 and HP150
- Zebra: RW420 and 2Q520 (in development)
- Canon: iP100 and iP110
- Printek: Interceptor 800
- Primera: Trio All-in-One (in development)

Headrest Printer Mount for Printek Interceptor 800

*U.S. Pats. 7637566, 7874612, 8336959, 9073464, additional patent pending

CAUTION: Headrest printer mount with printer is not intended to serve as a headrest, and must be removed and replaced with vehicle manufacturer's headrest if front seat passenger present.

Modular Mounting System: Convertible Headrest, Console and Partition Mounts

All LEM printer mounts are assembled using a printer mounting platform for the applicable printer plus specific mounting hardware depending on whether the printer is to be mounted in place of the headrest or to the console or the partition. This flexibility allows the end user to convert the printer mount among various mounting locations in the vehicle without having to purchase a new printer mounting platform.

Our console bracket attaches to the side or rear of the console between the vehicle seats. The printer mount is adjustable up and down, front to rear and side to

side to accommodate different configurations of radios and other console equipment as well as user preferences.

Our partition bracket secures the printer to most partitions, whether steel, plexi-glass or cage units.

Changing vehicles or preferences? Our printer mount is easily convertible to a head-rest mount.

Thermal Roll Paper for Brother PocketJet Printer

Heavyweight Quality Thermal Roll Paper • 8 ½" x 100' • ½" ID (Solid Wall Core) • 36 rolls/case • 10 year archiveability • Each roll individually bagged

LEM Solutions is now selling thermal paper for the Brother PocketJet Printer. Our paper is made from a thick base stock that has the feel of regular, non-thermal papers. It performs to standards not readily achievable with thermal media normally found in the marketplace, especially in high heat and high humidity environments. It has better tear, stiffness, and smoothness characteristics than most grades of thermal paper on the market today.

We sell only by the case in order to keep our prices low. Please visit our online store at

www.lemsolutionsmarket.com

to purchase quality Brother PocketJet Thermal Paper Rolls at a great price!
